

Avviso di Seminario

Martedì 09 ottobre 15:15 Sala Riunioni (1)

Paolo Bartalini
Prof.
National Taiwan University

Terrà un seminario dal titolo :
"Multiple Parton Interactions at the LHC, from soft to hard"
"

Abstract :

The Multiple Parton Interactions measurements at hadron colliders are reviewed with particular emphasis on the Double Parton Scattering phenomenology.

These rare Standard Model processes with two or more separate hard scatterings in a single collision may give rise to "unexpected" backgrounds in the search for new physics at the Large Hadron Collider; their study also provides a deep information on the hadronic structure.

Il Direttore
Dr. Pasquale Lubrano
