

UNIVERSITÀ DEGLI STUDI
DI PERUGIA

DOTTORATO DI RICERCA

SCIENZA E TECNOLOGIA PER LA FISICA E LA GEOLOGIA

Short Course on Magma, Eruptions and Risks (MER).

(given by Chiara Cardaci, Jacopo Taddeucci and Francesco Vetere)

15-17 March 2016

After last year successful first edition of the “**Magma, Eruption and Risks**” short course we are pleased to announce the second edition that will be held at the Department of Physics and Geology of the University of Perugia 15-17 March 2016.

The short course is divided into three days (corresponding to 3 credit points) of lectures (morning) and exercises (afternoon) with the aim to provide an up to date and modern knowledge about magmatic-volcanic processes in the Earth interior, their eruption, and their impact on society.

The short course is meant for PhD students. The number of participants is restricted to a maximum of 20.

A certificate of participation in the short course on Magmas, Eruption and Risks can be obtained.

There are no registration fees. However, participants have to organize their travel and stay in Perugia.

Detailed program is coming soon and will be posted on the Petro-Volcanology Research Group - PVRG - web site (<http://pvrg.unipg.it>) and PVRG Twitter account (<https://twitter.com/PVRGunipg>).

For additional information and registration please contact Francesco Vetere (francesco.vetere@unipg.it). Deadline is March 5.

Best wishes

Chiara Cardaci, Jacopo Taddeucci and Francesco Vetere
